

## A Best-in-Class Network for Rapid Expansion in the Caribbean

This satellite internet service provider (ISP) is a global aerospace designs, manufactures and launches advanced rockets and spacecraft for transporting goods and people to Earth orbit and, eventually, beyond.

One of their most innovative ventures is a satellite internet network that which aims to provide high-speed, high-capacity and reliable internet connectivity to people and businesses around the world. As part of their expansion, they partnered with Liberty Networks to set up four ground stations across the Caribbean region while increasing capacity in two nations in the Greater Antilles.

### Challenge

Traditional satellite services do not meet the high-speed, high-capacity and high-reliability requirements demanded by businesses and the retail consumer market. The satellite network was developed to fill this gap; however, their planned expansion into the Caribbean required the expansion of their system of ground stations.

### Solution

Beginning in October of 2021, Liberty Networks partnered with this satellite ISP to provide the networking expertise and services they required in six strategically-selected countries by the fall of 2022. The project was executed on an aggressive timeline, with country-specific designs completing the discussion, review and approval process within 60 days and orders in flight just 30 days later.

Two of the six country locations were installed and operational by March 2022, one came online in July 2022

**Lightning-fast deployment, bringing a satellite ISP services to the Caribbean in record time.**

and the remaining three were operational by August 2022. This swift deployment was a tremendous achievement for the Liberty Networks and the client's teams, with the client indicating that Liberty Networks has achieved one of the fastest installations of any of their partners, worldwide.

The services in one nation have been so well received that the client is already interested in upgrading from their initial capacity purchase. The inspirational success of the partnership demonstrates the determination, professionalism and speed at which the teams worked to make the project a reality that is worthy of industry recognition.
